1.2	WINTID API: BULK IMPORT OF PFIELDS	3

1. What's New in WinTid Version 2026.01.2

WinTid version 2026.01.2 was released on January 13th, 2026.

1.1 Mark Notifications for Approved/Declined Absences as Read

Notifications informing employees that an absence has been approved, declined, or had its approval removed will now automatically disappear when the employee clicks on them.

1.2 WinTid API: Bulk Import of Pfields

A new endpoint has been added to the WinTid API: /pfield/bulk

This endpoint makes it possible to import multiple p-fields in a single operation. For more information, please refer to the integration documentation.
