1. What's New in WinTid Version 2026.02.3

WinTid version 2026.02.3 was released on February 24th, 2026.

1.1 Personalia page rewritten in Vue

The Personalia page has been rewritten in Vue. When clicking “New employee” in Personalia, a dialog box is displayed where all mandatory fields must be completed: First name, Last name, Employee number, Employed from date, Firm and Department. After completing these fields, you must click Save to create the employee before entering the remaining information. Apart from this, there are no significant functional changes, but the page is now easier to maintain and further develop.

1.2 Program functions is now Menu access

Program functions has been renamed to Menu access. This is a name change only; the functionality remains unchanged.

1.3 WinTid Staffing: Publishing and assigning shifts in Audit log

WinTid Staffing: Publishing and assigning of shifts is now shown in the Audit Log.

These new event types are shown:

- Shift published - A shift in Work Schedule Overview has been published and made available to employees
- Shift unpublished - A previously published shift in Work Schedule Overview has been withdrawn
- Published shift assigned - A published shift in Work Schedule Overview has been assigned to an employee
- Published shift unassigned - An employee has been removed from a published shift in Work Schedule Overview
- Shift published and assigned - A shift in Work Schedule Overview has been published and assigned to an employee in the same operation
- Shift assigned - A shift has been added to an employee in Work Schedule Overview
- Shift unassigned - A shift has been removed from an employee in Work Schedule Overview
- Shift changed - An existing shift has been changed in Work Schedule Overview
- Shift moved from - A shift has been moved from one employee to another in Work Schedule Overview. Logged on the employee the shift was moved from
- Shift moved to - A shift has been moved to an employee from another in Work Schedule Overview. Logged on the employee the shift was moved to
